

2010 MR COLLECTION

Set your living spaces apart with innovative sculptures, furnishings and lighting from landscape designer Ben McMaster and Michael Rennie.

The MR Collection uniquely combines the use of plants within modular furnishings, with refined designs to help you create indoor and outdoor living places unlike any other.

Cutting edge planter liner and watering technologies are incorporated within our planters, which are self-contained and include water storage allowing less watering frequency.

Manufactured using galvanised steel, a revolutionary tag-attaching system, and a range of powder coated colours, the MR collection is as durable as it is beautiful.

Our art and sculpture range will be released during the year, and discontinued after the release of a limited edition. Each piece is hand-painted to order, which ensures exclusivity.

*"We hope you enjoy the 2010 collection!"*

Red	(powder coat)
Rust	(paint/acid and polyurethane)

LECHUZA SUB-IRRIGATION SYSTEM

- Indoor/outdoor liner (including red drain plug for indoor use).
- Water level indicator (ensures total watering control).
- Supply shaft with cap (easy filing with water and fertiliser).
- Separator (forms the large water reservoir – 8 litres).
- Package of granulate (delivers perfect moisture balance for your plant).
